Could Economic Pressures Threaten the Integrity of Your EH&S Compliance?

In today's economic climate it can be difficult for companies to devote the needed resources to maintain compliance activities at a sustained and satisfactory level.

Kestrel Management Services believes it is essential to develop and maintain key internal controls to ensure the reliability of compliance systems and performance.

Our Approach

While compliance is not optional, methods of maintaining compliance are. Kestrel helps clients optimize compliance methods and improve performance using a systems model that is aligned with organization business objectives and capabilities. Understanding the scope and applicability of mandatory requirements is the cornerstone of compliance risk management. From this point, we use a stepped approach to develop a detailed model of business objectives, goals and exposure analysis. Then we develop a strategy to synchronize compliance risk performance objectives to resource allocations.
